

PATIENT: MUSTANSIR

AGE: 18 Years

CHIEF COMPLAINT & SYMPTOMS

SNEEZING COUGH AD COLD AND FEVER (Duration: 4 DAYS | Severity: Severe)

DETAILED CLINICAL SUMMARY

The symptoms indicate a common cold, which is usually caused by viral infections. It typically resolves within a week but can cause significant discomfort. Management focuses on symptom relief and supportive care. It's important to rest, stay hydrated, and monitor symptoms for any worsening.

Rx RECOMMENDED PHARMACOTHERAPY

Medication Name	Dosage	Frequency	Duration
Paracetamol 500mg	1 tablet	Every 6 hours as needed for fever and pain	Up to 5 days
Cetirizine 10mg	1 tablet	Once daily at bedtime	5 days

ADVICE & LIFESTYLE MODIFICATIONS

- Gargle with warm salt water to soothe the sore throat.

- Drink plenty of fluids.

HABITS TO CHANGE / PREVENTIVE ADVICE

- Avoid close contact with others to prevent spreading the infection.

- Practice good hand hygiene.

POSSIBLE ALLERGIES / INTERACTIONS TO WATCH

- Monitor for any allergic reactions to medications like Cetirizine, especially if there is a history of allergies.
