

PATIENT: MUSTANSIR

AGE: 18 Years

CHIEF COMPLAINT & SYMPTOMS

fever (Duration: 12 hours | Severity: Mild)

DETAILED CLINICAL SUMMARY

This condition is typically caused by viral infections and is characterized by mild fever, cough, sore throat, and body aches. It is usually self-limiting, meaning it will resolve on its own with appropriate care. Rest, hydration, and symptomatic treatment are key to recovery. Expect symptoms to improve within a week, but monitor for any worsening signs.

Rx RECOMMENDED PHARMACOTHERAPY

Medication Name	Dosage	Frequency	Duration
Paracetamol 500mg	1 tablet	Every 6 hours as needed for fever and body aches	3 days
Cetirizine 10mg	1 tablet	Once daily at bedtime	5 days

ADVICE & LIFESTYLE MODIFICATIONS

- Stay well-hydrated by drinking plenty of fluids like water, herbal teas, and broths.

- Gargle with warm salt water.

HABITS TO CHANGE / PREVENTIVE ADVICE

- Increase hand hygiene by washing hands frequently to prevent further infections.

- Avoid close contact with sick individuals.

POSSIBLE ALLERGIES / INTERACTIONS TO WATCH

- Watch for any allergic reactions to medications such as Cetirizine, especially if there is a history of allergies.
