Patient: mustansir

Username: mustansir

Patient Summary

Age: 18 | Gender: Male | BMI: 22.2

Chronic diseases: diabetes

Previous surgeries: none

Allergies: dust, pollen , milk

Current medications: poiz 30, cyblex m80

Presenting Complaint

Symptoms: cough , sore throat, nausea, headache

Duration: 1 day

Severity: Moderate

Diagnostic Findings

****Preliminary Diagnosis List:****

****Disease 1: Viral Pharyngitis****

Likelihood: High

Explanation: The combination of cough and sore throat often indicates a viral infection affecting the throat. Given the acute onset (1 day) and moderate severity, viral pharyngitis is a common cause, especially in younger individuals.

****Disease 2: Allergic Rhinitis****

Likelihood: Moderate

Explanation: The patient has a history of allergies (dust and pollen), which may contribute to throat irritation, cough, and nasal symptoms. Allergic rhinitis can exacerbate symptoms similar to those of a respiratory infection.

****Disease 3: Gastroesophageal Reflux Disease (GERD)****

Likelihood: Moderate

Explanation: Nausea and sore throat can be symptoms of GERD, especially if stomach acid is refluxing into the esophagus. While less likely given the acute presentation, it should be considered due to the nausea.

****Home Remedies:****

- **Saltwater Gargle:**** Dissolve half a teaspoon of salt in warm water and gargle several times a day to soothe the throat.
- **Honey and Lemon:**** Mix honey and lemon juice in warm water to help alleviate throat irritation and provide soothing relief.
- **Stay Hydrated:**** Drink plenty of fluids, such as herbal teas or clear broths, to keep the throat moist and reduce irritation.
- **Steam Inhalation:**** Inhaling steam from hot water can help relieve cough and nasal congestion.
- **Rest:**** Ensure sufficient rest to aid the body's immune response.

****Medication Recommendations (Available in India):****

- **Paracetamol (500 mg):**** Take 1 tablet every 6-8 hours as needed for headache and throat pain. Maximum 4 grams per day.
- **Antihistamines (e.g., Cetirizine 10 mg):**** Take 1 tablet once daily for allergy symptoms if rhinitis is suspected.
- **Guaifenesin (e.g., Mucolite):**** Take as
